for more discreet covert operations, yet giving the flexibility of hands-free communication.

**Note:**

- It is the responsibility of the user to ensure that the chosen accessory is suitable for their intended use.
- The PMLN7269\_NS supports AI (Artificial Intelligence) trained noise suppression if the radio has the feature.

## Operation

### Attaching the Surveillance Accessory to the Radio

1. Turn off the radio.
2. Firmly plug the accessory connector into the radio side and secure the connector as shown in Figure 1.

Figure 1: Secure the accessory connector

3. Turn the radio ON - ensure that you do not set the volume level too high.

**Note:** Once the accessory is connected, the radio microphone and speaker are disabled (refer to CPS setting for other configurations).

4. Place the accessory in your ears.

## Foreword

### RF Energy Exposure and Product Safety Guide for Portable Two-Way Radios

#### Attention!

These Surveillance Earpieces, when attached to the radio, are restricted to occupational use only to satisfy FCC/ICNIRP RF energy exposure requirements. Before using this product, read the RF Energy Exposure and Product Safety Guide that ships with the radio which contains instructions for safe usage and RF energy awareness and control for compliance with applicable standards and regulation.

#### Acoustic Safety

Exposure to loud noises from any source for extended periods of time may temporarily or permanently affect your hearing. The louder the volume, the less time is required before your hearing could be affected. Hearing damage from loud noise is sometimes undetectable at first and can have a cumulative effect. To protect your hearing:

- Use the lowest volume necessary to do your job.
- Turn up the volume only if you are in noisy surroundings.
- Turn down the volume before connecting headset or earpiece.
- Limit the amount of time you use headsets or earpieces at high volume.
- When using the radio without a headset or earpiece, do not place the radio speaker directly against your ear.

#### Description

The PMLN7269\_NS is a two-wire surveillance style accessory with one wire for listening through an acoustic tube and another separate wire for transmitting using an integrated microphone/Push-to-Talk (PTT) housing.

The Clear Acoustic Tube snaps on to the earbud part of the kit for enhanced discrete communication. The integrated microphone/PTT comes with a clothes clip allowing you to wear it under your uniform

5. Adjust the volume on the radio to a comfortable listening level.
6. Press the PTT button, and speak into microphone to transmit.
7. To receive information, release the PTT button.

### Removing the Surveillance Accessory from the Radio

1. Turn off the radio.
2. Carefully remove the accessory connector from the side of the radio as shown in Figure 2.

Figure 2: Remove the accessory connector

## Service

The following replacement parts and alternate configurations shown in Table 1 are available for PMLN7269\_NS. Please contact your local Motorola Solutions Representative or Dealer for details.

Table 1: Replacement Parts/Options

Part Description	Part Number
Clear Acoustic Tube Earpiece, Assembly	RLN6242_
Noise Attenuating Plugs	5080384F72_
Ear Tip, Clear	RLN6282_
