

# D-Style Earpiece

## For Remote Speaker Microphone

- *Private Listening*
- *Comfortable for extended wear*
- *Suitable for use in noisy environment*

This Motorola D-Style Receive Earpiece allows the user to receive messages in private when connected to the Remote Speaker Microphone (RSM). It can be worn over either side of the ears and provides comfortable and secure fit. The coiled cord is designed for flexibility in movement.

## ACOUSTIC SAFETY

Exposure to loud noises from any source for extended periods of time may temporarily or permanently affect your hearing. The louder the radio's volume, the less time is required before your hearing could be affected. Hearing damage from loud noise is sometimes undetectable at first and can have a cumulative effect.

To protect your hearing:

- Use the lowest volume necessary to do your job.
- Turn up the volume only if you are in noisy surroundings.
- Turn down the volume before adding headset or earpiece.

- Limit the amount of time you use headsets or earpieces at high volume.
- When using the radio without a headset or earpiece, do not place the radio's speaker directly against your ear.

## OPERATING INSTRUCTIONS

1. Turn radio OFF and plug the connector into the RSM jack socket.
2. Slip the flexible "D" ear hook over the ear and adjust the earpiece until it is comfortably resting on the ear lobe.
3. Turn the radio ON and adjust to a comfortable volume.

Caution

**DO NOT connect directly to Radio Accessory Jack.**
