

## Ear Tip Usage Note

- Before using, inspect the earpiece and ear tip for signs of wear, damage, and loose or missing components. Do not use the earpiece if it is damaged.
- Replace ear tips on a regular basis. Do not reuse an ear tip that has been unintentionally detached from a connector.
- Slowly and carefully insert or remove the ear tip into or out from the ear canal.
- Insert the ear tip as far as required for an acoustic seal only. The base of the ear tip must be accessible for removal.
- Remove the ear tip by firmly grasping the base of the ear tip. Do not pull or yank the connector or the tube.
- Use a slow twisting motion when removing the ear tip to avoid discomfort and to carefully break the acoustic seal.
