

## **MTP830 S / MTP830 FuG TETRA Terminals IP55 Compliance and Certification**

Mechanical hardware improvements introduced to the MTP830 S and MTP830 FuG TETRA terminals allowed certification to IP55.

To ensure compliance with IP55, attach the Protective Cover (part number: 3287533V81) to the CE Bottom Connector (as illustrated in this leaflet).

When the CE Protective Cover (part number: 3287533V81) is not attached, the terminals comply to IP54 only.

### **CE Protective Cover Installation**

## List of IP55 Certified Terminals

<b>Tanapa</b>	<b>Description</b>
