Supporting Release EVOLVE_R02.00.14

February 2024

Features/Enhancements in this release
- Upgrade to Android 13
- Volume Knob Enhancement as Master Volume Control to control all volume types
- Enable installation of Playstore WAVE APK (which supports Critical Connect) without disabling the bundled WAVE APK
- Button support for WAVE APK from Playstore
  - NA/LACR APK : Version 12.3.1.25 onwards
  - Other region APK: Version 11.2.0.111 onwards
- Audio Quality Enhancement

Fixes in this release
- Fixes related to SPARK specific requirements
- VOLTE support for Singapore, Israel carriers
- Fix for initial audio truncation using WM500
- Optimization for touch screen display
- Fix to show "My Phone Number" correctly
- Noise-canceling optimization
- Enable QR Scanning from Quick Start Menu
- GPS Performance and Accuracy improvement
- Fix related to Dynamic Data Switch for Japan Sim
- Fix related to Security vulnerability - libwebp - CVE-2023-4863

Special Note:
When a Bluetooth device is connected to Evolve Radio in EVOLVE_R01.04.05 or earlier software and upgraded to EVOLVE_R02.00.14, WAVE PTX APP requires Nearby Devices permission. Launching the WAVE PTX APP first time after upgrade will prompt a message to enable this permission.

Please enable the Nearby Devices permission in the WAVE PTX app setting and either power cycle the Bluetooth device or toggle off and on Bluetooth on Evolve Radio. To enable the permission, long press the Wave app and select "App info", select "Permissions'', select "Nearby devices", select "Allow".

*Limitation:

To upgrade from EVOLVE_R01.04.05 or earlier software to EVOLVE_R02.00.14, the upgrade has to be done manually, using an SD-Card provided by MSI. Please get in touch with your dealer or MSI support team to get this upgrade.

Future releases from EVOLVE_R02.00.14 onwards will be able to continue with Over-The-Air Updates as earlier practices on Android devices.

Supporting Release EVOLVE_R01.04.05

April 2022
