Safety and General Information

Caution

Before using this radio, read this booklet which contains important operating instructions

For information on product details, brochures, user manuals and approved accessories, please refer to www.motorolasolutions.com

Compliance with RF Exposure Standards

National and international regulations require manufacturers to comply with the RF energy exposure limits for portable two-way radios before they can be marketed. Your Motorola Solutions two-way radio is designed, manufactured, and tested to comply with all applicable national and international regulations for human exposure to radio frequency electromagnetic energy.

RF Energy Exposure Awareness and Control Information and Operational Instructions for **General Population and Uncontrolled Environment**

For more information on what RF energy exposure is, see the following websites:

- https://www.fcc.gov/
- http://www.who.int/peh-emf/project/en/
- http://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf11467.html http://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf01904.html
- For additional information, see

Class B Digital Device

For a Class B digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions. may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician

Operating Instructions

- Transmit no more than 50% of the time. To transmit (talk). press the Push-To-Talk (PTT) button. To receive calls, elease the PTT button.
- Hold the radio in a vertical position in front of the face with the microphone (and other parts of the radio including the antenna) at least 1 in. (2.5 cm) away from the nose or lips.
- Antenna should be kept away from the eye. When worn on the body, always place the radio in a Motorola
- Solutions-approved clip, holder, holster, case, or body harness for this product. • DO NOT hold the antenna when the radio is transmitting.
- DO NOT use any portable radio that has a damaged antenna If a damaged antenna comes into contact with your skin, a minor burn can result. • To ensure continued compliance with applicable RF exposure
- limits, use only Motorola Solutions-approved, supplied or replacement antennas, batteries, and accessories.
- For a list of Motorola Solutions-approved accessories please refer to your user manual or visit www.motorolasolutions.com

Acoustic Safety

BC BC

Exposure to loud noises from any source for extended periods of time may temporarily or permanently affect your hearing. The louder the volume of the radio, the sooner your hearing will be affected. Hearing damage from loud noise is sometimes undetectable at first, and can have a cumulative effect.

- To protect your hearing, follow these precautions: Use the lowest volume necessary to do your job.
- Turn up the volume only if you are in noisy surroundings. Turn down the volume before putting on a headset or
- headphones.
- Limit the amount of time you use a headset or headphones at high volume
- · When using the radio without a headset or headphones, do not place the speaker of the radio directly against your ear.

Medical Devices

If you use a personal medical device, such as a pacemaker or hearing aid, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your physician may be able to assist you in obtaining this information

Operational Warnings

The following explains the operational warnings:

For Vehicle With Air Bags

Warning:

Refer to vehicle manufacturer's manual prior to nstallation of electronic equipment to avoid nterference with air bag wiring

DO NOT place a portable radio in the area over an air bag or in the air bag deployment area. Air bags inflate with great force. If a portable radio is WARNING placed in the air bag deployment area and the air bag inflates, the radio may be propelled with great force and cause serious injury to occupants of the vehicle

Potentially Explosive Atmospheres

Warning

• Do not carry a radio that is not certified for Hazardous Locations into a potentially explosive atmosphere. It could result in a serious injury or death. You should only use a radio certified for hazardous locations in potentially explosive atmospheres. Explosive atmospheres refer to hazard

WARNING

classified locations that may contain hazardous gas, vapors, dusts, such as fueling areas below decks on boats, fuel or chemical transferor storage facilities, and areas where the air contains chemicals or particles such as grain. dust or metal powders. Areas with potentially explosive atmospheres are often, but not always

DO NOT remove install or charge batteries in such areas, or remove or install antennas. Sparks n a potentially explosive atmosphere can cause an explosion or fire resulting in bodily injury or even death

Blasting Caps and Blasting Areas

Warning: To avoid possible interference with blasting operations, turn off your radio when you are near electrical blasting caps, in a blasting area, or in areas posted: "Turn off two-way radio. Obey all signs and instructions.

Batteries

Jse only Motorola Solutions approved batteries. Risk of explosion if the battery is replaced by an incorrect type.

- charger.
- Charge your battery using the approved Motorola Solutions
- Use the battery in accordance with its water and/or dust Ingress Protection (IP) rating.
- Do not discard your battery into a fire · Do not replace the battery in any area labeled "Hazardous

- Do not disassemble, crush, puncture, shred, or otherwise attempt to change the form of your battery.
- Do not dry a wet or damp battery with an appliance or heat
- source, such as a hair dryer or microwave oven.
- Do not allow conductive material such as jewelry, keys, or beaded chains to touch exposed battery terminals

Safety Instruction for Power Supply

- The power supply is for use with equipment according to IEC/EN/UL 62368-1/60950-1.
- The power supply is for indoor use in dry locations. The equipment should be connected to a nearby and
- easily accessible socket outlet. If the power supply is damaged or defective, do not repair or use the power supply.
- For more details, please refer to https:// www.motorolasolutions.com/en_xu/support/emeacompliance.html#phnav_other-products.

Do Not Substitute Options or Accessories

The Motorola Solutions communications equipment certified as intrinsically safe by the approving agency (FM, UL, CSA, CENELEC) is tested as a complete system which consists of the listed agency approved portable, approved battery, and approved accessories or options, or both. This approved portable and battery combination must be strictly observed. There must be no substitution of items, even if the substitute has been previously approved with a different Motorola Solutions communications equipment unit. Approved configurations are listed by the

approving agency (FM, UL, CSA, CENELEC).
The Intrinsically Safe Approval Label affixed to radio refers to the intrinsically safe classification of that radio product, and the approved batteries that can be used with that system The manual PN referenced on the Intrinsically Safe Approval Label identifies the approved accessories and or options that can be used with that portable radio unit. Using a non-Motorola Solutions-intrinsically safe battery and/or accessory with the Motorola Solutions-approved radio unit will

void the intrinsically safe approval of that radio unit. European Union (EU) Waste of Electrical and Electronic Equipment (WEEE) Directive

he European Union's WEEE directive requires that products sold into EU countries must have the crossed out trash bin label on the product (or he package in some cases). As defined by the WEEE directive, this cross-out trash bin label neans that customers and end-users in EU ountries should not dispose of electronic and lectrical equipment or accessories in household waste. Customers or end-users in EU countries should contact their local equipment supplier epresentative or service centre for information about the waste collection system in their country.

Notice to Users (FCC and ISED)

This device complies with Part 15 of the FCC rules and ISED's license-exempt RSS's per the following conditions

This device may not cause harmful interference. This device must accept any interference received, including interference that may cause undesired operation.

Supplier's Declaration of Conformity

Supplier's Declaration of Conformity Per FCC CFR 47 Part 2 Section 2.1077(a)

Responsible Party Name: Motorola Solutions, Inc. Address: 2000 Progress Pkwy, Schaumburg, II. 60196

hone Number: 1-800-927-2744 ereby declares that the product lodel Name: T460. T465. T402 onforms to the following regulations FCC Part 15, subpart B, section 15.107(a), 15.107(d), and section 15.109(a).

FCC Licensing Information

USA (FCC)/CANADA (ISED)

According to FCC Part 95. FRS devices do not require a license. Use of Motorola radio in Canada is subject to the rules and regulations in ISED RSS 210 and do not require a license.

Changes or modifications not expressly approved by Motorola Solutions may void the user authority granted by the FCC or ISED to operate this radio and should not be made. To comply with FCC or ISED requirements, transmitter adjustments should be made only by or under the supervision of a person certified as technically qualified to perform transmitter maintenance and repairs in the private land mobile and fixed services as certified by an organization representative of the user of those services. Replacement of any transmitter component (crystal) semiconductor, etc) not authorized by the FCC or ISED equipment authorization for this radio could violate FCC or ISED

Note: Use of this radio outside the country where it was intended to be distributed is subject to government regulations and may be prohibited

Charging Port

- Exercise care when removing NiMH or AA batteries. Do not use sharp or conductive tools to remove either of these batteries.
- Remove the batteries before storing your radio for extended periods of time. Batteries corrode over time and may cause permanent damage to your radio.

Battery Capacity Maintenance

- Charge the NiMH batteries once every 3 months when not
 - Before placing the radio in storage, remove the battery
- Store the NiMH batteries in temperature between -20 °C to 35 °C and in low humidity. Avoid damp conditions and corrosive materials

Using the Micro-USB Charger

The micro-USB charger is a handy port that allows you to conveniently charge your NiMH battery pack. Make sure your radio is turned OFF.

- Plug the micro-USB cable into the micro-USB charging port on your radio.
- Connect the USB charger to a nearby and easily accessible wall power outle
- An empty battery will be fully charged in 14 hours. The battery meter on LCD will move to indicate the battery
- is charging.

Note:

- When moving between hot and cold temperatures, do not charge the NiMH battery pack until the battery temperature acclimates (usually about 20 minutes).
- For optimal battery life, remove the radio from the charger within 16 hours. Do not store the radio while connected to

Attaching and Removing the Belt Clip

- Attach the belt clip to the Talkabout plate at the back of the radio until the clin clicks in place
- Attach the belt clip to pocket or belt strap until the clip

- Pull the release tab on top of the belt clip to release the
- Push the belt clip with the other hand towards the top of

Turning your Radio On and Off

- Turn ${\color{red}\square}$ clockwise to turn the radio on and counterclockwise to turn the radio off.
- In the ON position, the radio chirps and briefly shows all feature icons available on the radio. The display screen then shows the current channel, code and all features that are enabled. The radio is now in

Setting the Volume

Two-Wav mode

Press and hold (for three seconds while rotating (until you reach a comfortable listening level.

- Rotate Clockwise to increase the volume
- Rotate Counterclockwise to decrease the volume. Do not hold the radio close to your ear. If the volume is set to an uncomfortable level, it could hurt your ear.

Talking and Listening

To communicate, all radios in your group must be set to the same channel and Interference Eliminator Code.

To talk, press and hold the PTT button. When transmitting,

TW0-WAY icon blinks and **Tx** is shown. If it is a high power transmission, **H**i is shown. If it is a low power transmission, Lo is shown.

When you are finished talking, release the PTT button.

3. When receiving, TW0-WAY icon blinks and Rx is shown. If it is a high power channel, **H** is shown. If it is a low power channel, **L0** is shown.

For maximum clarity, hold the radio two to three inches away from your mouth and speak directly into the microphone. Do not cover the microphone while talking.

Talk Range

Your radio is designed to maximize performance and improve transmission range. Do not use the radios closer than five feet

Power Boost

To boost the power of your radio to high power, press the top portion of the PTT button when talking. If you know your party is close by, you can conserve the energy of your battery by pushing the lower part of the PTT button to use less power

Note: If you are on an FRS only channel (see "Channels and Frequencies") the radio will only use low power when either portion of the PTT button is pressed. Power Boost is not applicable for model T400.

Monitor Button

Pressing and holding for three seconds allows you to listen to the volume level of the radio when you are not receiving. This allows you to adjust the volume, if necessary. You can also press (ステ) to check for activity on the current channel before you

Push-to-Talk Timeout Timer

To prevent accidental transmissions and save battery life, the radio emits a continuous warning tone and stops transmitting if you press the PTT button for 60 continuous seconds.

Mode Button

By pressing "mode" button, the user will be seamlessly switching between two-way and weather mode. When radio is in two-way mode, **TW0-WAY** will be shown. When radio is in weather mode, **WEATHER** will be shown. Corresponding setting and information will be shown on the LCD.

Menu Options

Selecting the Channel

Your radio has 22 channels. The channel is the frequency the radio uses to transmit. Channels 8-14 are FRS 0.5 watt only and all other channels are GMRS. (See the "Channels and Frequencies" table on overleaf for details).

- 1. With the radio on, press (a) until the channel number starts to flash. When the radio is on a 0.5 watt channel.
- display shows $oldsymbol{\mathsf{L0}}$. When the radio is on a 1.5 watts channel, display shows **Hi**. The current channel flashes.
- Press + or and select an unused or quiet channel. Press the PTT button to save the channel setting or (a) to

Selecting the Interference Eliminator Code

Interference Eliminator Codes help minimize interference by blocking transmissions from unknown sources. Your radio has 121 Interference Eliminator Codes. Codes 1 – 38 are standard analog codes that appear on other FRS/GMRS radios. Codes 39 - 121 are additional digital codes added for superior interference protection, 0 is the off position, no analog or digital

codes are enabled To set the code for a channel

- 1. Press until the code starts to flash.
- 2. Press (+) or (-) to select the code.
- 3. Press the PTT button to save the code setting or a to continue set up. You can set a different code for each channel using this

procedure. An extended press of + or - allows you to scroll through the Interference Code rapidly so you can quickly reach the code vou want. Note: On a radio that uses Interference Eliminator Codes, the

code must be set to 0 to communicate with radios that do not have Interference Eliminator Codes. Select 0 for "no tone, no code" on the display of your radio.

Setting and Transmitting Call Tones

your group so you can alert them that you want to talk. Your radio has 20 call tones from which to choose.

To set a call tone:

Press until J appears. The current call tone setting will flash

Press the PTT button to set the new call tone or (a) to

To transmit your call tone to other radios set up to the same channel and Interference Eliminator Code as your radio, press

Your radio can transmit different call tones to other radios in

2. Press + or - to change and hear the call tone

continue set up.

Note: Setting the call to OFF disables the call tone feature

Hands-Free Use Without Accessories (ivox)

You can use the **iVOX** feature to transmit hands-free without the need for any headset accessories. Once **IVOX** is turned on. the radio detects your voice and transmits when you speak into the internal microphone

- Press until **iVOX** appears on the display. The current setting will flash.
- 2. Press $\stackrel{(+)}{-}$ or $\stackrel{(-)}{-}$ to select On or Off or set sensitivity L1, L2 or L3
- 3. Press the **PTT** button to set or (a) to continue set up.

Hands-Free Use with Accessories (vox)

You can transmit hands-free more reliable with the use of optional headset accessories. Once VOX is turned on, the radio detects your voice and transmits when you speak. Many accessories (sold separately) are available for your radio. For more information, visit our website at www.motorolasolutions.com/TalkaboutAccessories or call 1-800-448-6686.

- Turn the radio off and plug the VOX accessory into the accessory port.
- 2. Turn the radio on. **vox** shows on the display.
- Adjust the volume appropriately by rotating [1]. Lower the volume before placing the accessory on your head or in vour ear
- To turn off, simply remove accessory.

Note: There is a short delay between the time you start talking and when the radio transmits. There is a short delay before the transmission is completed

Setting the Sensitivity Level When in vox Mode

Adjusting the sensitivity level of the radio helps minimize the possibility of unintended noises triggering a transmission and helps the radio pick up soft voices

- Press (a) until **VOX** appears. The current setting (1.1 - 1.3) will flash
- 2. Press (+) or (-) to select the sensitivity level.
- 3. Press the PTT button to set or (a) to continue set up.
- L3 = High Sensitivity for quiet environments
- L2 = Medium Sensitivity for most environments
- L1 = Low Sensitivity for noisy environments

Note: When you connect a headset, the radio is automatically set to the last chosen sensitivity level.

Setting the Extended Battery Save Level (♥)

This feature puts the radio into a low power "sleep" mode for cycle periods of 1, 2 or 3 seconds. The radio will briefly check for any channel activity after each sleep cycle. The sleep cycle repeats until a key is pressed or a call is received.

- Press until appears. The current setting (L0, L1, L2 or L3) will flash. 2. Press + or - to select the battery save level.
- 3. Press the PTT button to set or (a) to continue set up.
- L0 = Normal battery save mode
- L1 = 1 second extended battery save mode (low setting)
- L2 = 2 seconds extended battery save mode (mid setting)
- L3 = 3 seconds extended battery save mode (max setting)

- Signals received during the sleep period will not be heard until after the timer period expires. The first 1 – 3 seconds of speech can be missed. Do not use (battery save) L1. L2 or L3 settings when immediate response may be required.
- 2. **VOX** . **iVOX** and **Q**_τ modes are not available with extended battery save mode. Using Z, vox, ivox or enabling Q_T will necessarily disable the extended sleep cycle battery settings.
- Maximum battery life savings may be achieved only when usage is primarily in standby mode and very little TX or RX (talking or listening) use occurs. When RX or TX are often used, little or no battery life extension will occur

The \mathbf{Q}_T noise-filtering feature helps to ensure uninterrupted communication with other Motorola Solutions radios that have this feature. This feature also filters out unwanted transmissions from other radios. This is useful in places where there is heavy radio traffic, such as amusement parks or ski resorts

Note: \mathbf{Q}_{T} noise filtering is not available when the radio is scanning. Q_T noise filtering is not available when extended battery save is set to L1, L2 or L3. In consequence the Q_T will not appear in the Menu. You must set extended battery save to L0 in order to activate Ω_⊤ noise filtering

Press until Q_T displays. The current setting On/Off will

- 2. Press (+) or (-) to select On or Off.
 - Press the PTT button to set or (a) to continue set up.

To transmit to a radio that has \mathbf{Q}_{τ} noise filtering turned on:

- Select the same channel and Interference Eliminator Code as the other radio
- Press (1) to send a call tone. This allows your voice to pass through the \textbf{Q}_{T} noise filter on the receiving radio.
- Press the PTT button and speak normally.
- Note: Without first pressing ②, your message will not be heard. After this, for a 30-second period, starting after the last transmission, all transmissions received on the selected channel and code will pass through the noise filter. When radio goes to idle, ② will need to be pressed again to allow communication to pass through.

VibraCallTM Alert

VibraCallTM is a vibrating alert that notifies you that your radio is receiving a message. This is useful in noisy environments. When the alert is on, the radio vibrates once every 30 seconds when you receive a message on the channel and code you set.

- To turn vibrating alerts on, press 👜 until 🗓 is displayed. The current setting will flash.
- Press (+) or (-) to change the setting to On/Off.
- Press the **PTT** button to confirm or (a) to continue set up.

Note: VibraCallTM Alert is not applicable for model T400.

Keypad Tones

You may enable or disable the speaker key tones. You will hear the key tone each time a button is pushed.

- Press until 2 appears. The current setting On/Off will
- Press either (+) or (-) to turn On or Off.
- Press the **PTT** button to confirm or to continue set up.

Note: When the key tone feature is off, the following are not disabled:

- Transmit timeout alert tone
- Call tone
- Low battery alert tone or
- The transmitted talk confirmation tone

Transmitting a Talk Confirmation Tone

You can set your radio to transmit a unique tone when you finish transmitting. It is like saying "Roger" or "Over" to let others know vou are finished talking.

- With the radio on, press until the 4 appears. The current setting On/Off flashes.
- 2. Press (+) or (-) to turn On or Off.
- Press the **PTT** button to set or (a) to continue set up.

Special Features

Emergency Alert Mode

The Emergency Alert feature can be used to signal members in your group of your need for urgent help. T4XX series radios will operate in an automatic "hands-free" emergency control mode for a total of 30 seconds after activating the Emergency Alert. T4XX series radios in your group will automatically advance the speaker volume to the maximum setting and sound a warbling alert tone for 8 seconds. The alert tone is emitted from your own radio speaker and the receiving radios in your group. After the 8 second alert, any spoken words or incidental sounds at your end will be transmitted to the group for 22 seconds. For the 30 second duration of Emergency Alert mode, T4XX series radio controls and buttons will be locked to maximize reception of the emergency message

- Press and hold the Emergency Alert button for 3 seconds. Release the button the alert tone begins to sound. There
- is no need to continue to hold the Emergency Alert button or use PTT for your message to be transmitted. After the alert tone ends you may speak into the microphone. Your voice or incidental sounds will be
- After 30 seconds your radio speaker will emit a Talk Confirmation Tone. Operation then returns to normal

Note: All Motorola Solutions Talkabout EM, MJ, MR, MT, MU and T4XX series radios (except for model T400) are fully compatible with the Emergency Alert feature. Radios other than EM, MJ and MR series can receive the emergency alert signal, but will not respond with adjusted volume settings, locked controls or a warbling alert tone. Users of other radio models set to the same channel and Interference Eliminator Code will hear a steady tone for 8 seconds followed by the voice transmission for 22

WARNING: The Emergency Alert feature should only be used in the event of an actual emergency. Motorola Solutions is not responsible if there is no response to the emergency alert from the receiving group.

Built-in LED Flashlight with Power Outage Function

Press the flashlight button to turn and keep the light on. Press the flashlight button again, the light is off.

Note: Turn off the flashlight when not in use to conserve battery

Keypad Lock

To avoid accidentally changing your radio settings:

- Press and hold until displays. When in lock mode, you can turn the radio on and off, adjust the volume, receive, transmit, send a call tone and monitor channels. All other functions are locked
- To unlock the radio, press and hold (a) until (a) is no longer displayed.

Scanning Channels

Use scan to search the 22 channels for transmissions from unknown parties, to find someone in your group who has accidentally changed channels or to quickly find unused channels for your own use.

There is a priority feature and 2 modes of scanning (basic and advanced) to make your search more effective. The basic scan mode uses the channel and code combinations for each of the 22 channels as you have set them (or with the default code value of 1). The "Advanced Scan" mode will scan all channels for any and all codes, detect any code in use and use that code value temporarily for that channel

Priority is given to the "home channel", that is, the channel (and Interference Eliminator Code) your radio is set to when you start the scan. This means the initial channel (and code settings) is scanned more often than the other 21 channels and your radio will respond quickly to any activity occurring on the home channel as a priority.

To start Scanning:

- Briefly press the key. The scan will appear in the display and the radio will begin to scroll through the channel and code combinations.
- When the radio detects channel activity matching the channel and code combination, it stops scrolling and you can hear the transmission.
- To respond and talk to the person transmitting, press the PTT button within five seconds after the end of the
- The radio will resume scrolling through the channels five seconds after the end of any received activity
- To stop scanning, briefly press the (NO) key. To start Advanced Scanning
- Set the Interference Eliminator Code to "zero" or OFF
- Briefly press the key. The scan will appear in the display and the radio will begin to scroll through the channels. No Interference Eliminator Codes will filter what
- When the radio detects channel activity with ANY code (or NO code), it stops scrolling and you can hear the transmission. Any Interference Eliminator Code that may be in use by that party will be detected and displayed.
- To respond and talk to the person transmitting, press the PTT button within five seconds of the end of the transmission. The radio will transmit using the newly detected Interference Eliminator Code.
- The radio will resume scrolling through the channels five seconds after the end of any received activity
- 6. To stop scanning, briefly press the

Scanning Notes:

- If you press the PTT button while the radio is scrolling through inactive channels, the transmission will be on the home channel". Scanning will resume five seconds after the end of your transmission. You may press the key
- to stop scanning at any time. If the radio stops on an undesired transmission, you may immediately resume the scan by briefly pressing (+) or
- If the radio repeatedly stops on an undesired transmission, you may temporarily remove that channel from the scan list by pressing and holding (+) or (-) for three seconds. You may remove more than one channel in this way.
- To restore the removed channel(s) to the scan list, turn the radio off and then turn back on, or exit and re-enter the scanning mode by pressing (\mathbb{R}_{MON}) .
- You cannot remove the home channel from the scan list. In Advanced Scan, the detected code will only be used for one transmission. You must note that code, exit scan and set that detected code on that channel to permanently use the detected code.

Weather Receiver

National Oceanic and Atmospheric Administration (NOAA) Weather Radio and Environment and Climate Change Canada (ECCC) Weather Radio. You can listen to a weather channel (see "Weather Channels and Frequencies" table for details) or set your radio to alert you to emergency weather broadcasts that interrupt routine broadcasts. When you listen to a weather channel, you cannot use your radio in scan mode or for two-way

Both NOAA and ECCC have transmitters located throughout the United States and Canada, respectively. These transmitters broadcast watches, forecasts, and other information 24 hours a

Note: NOAA weather radio stations are assigned to cover specific areas and service may be limited. Please check with your local weather office for frequency and details or visit www.weather.gov/nwr in the US to view the appropriate transmitter for your area. The use of the NOAA logo does not provide an endorsement or implied endorsement by the National Weather Service of NOAA, nor does the use of the Weather radio logo provide an endorsement or implied endorsement by Environment and Climate Change Canada (ECCC).

Entering Weather Mode

From two-way mode, press MODE to enter weather mode

WEATHER

Setting the Weather Channel

Your radio receives weather frequencies:

- In weather mode, press until weather channel number
- Press (+) or (-) to select the appropriate channel with good reception in your area
- Press the PTT button to set or (a) to continue set up

Setting the Weather Alert

Your radio can be set to respond to NOAA Weather Radio emergency messages. A special alarm tone sounds an alert and turns on the weather receiver to give you immediate weather and emergency information

- In weather mode press (a) twice until (b)! displays.
- 2. Press (+) or (-) to select On/Off.
- 3. Press the PTT button or (a) to exit the weather menu set
- Press MODE to return to two-way mode. If you activate Weather Alert and return to two-way mode 60! will

back to two-way mode. As with two-way radio reception, weather channel reception depends on how close you are to a transmitter and whether you are indoors or outdoors. Because weather channels are

transmitted without codes, they may contain static or noise.

Weather Alert will not function while actively transmitting or

Note: When the weather channel is activated, either manually

or after receiving an alert, and no buttons are pressed for

5 minutes, the weather mode will automatically revert

receiving in two-way mode. Weather Channels and Frequencies

Weather Channel	nel Frequency Weather Channe		Frequency

Warranty

Consumer Two-Way Radio Products and Accessories purchased in the United States or

What Does this Warranty Cover?

Subject to the exclusions contained below Motorola Solutions Inc. ("Motorola") warrants the Motorola branded consumer two-way radios that operate via Family Radio Service or General Mobile Radio Service ("Products"), the Motorola branded or certified accessories sold for use with these Products ("Accessories") to be free from defects in materials and workmanship under normal consumer usage for the period(s) outlined below. This limited warranty is the exclusive remedy of a consumer, and applies as follows to new Products and Accessories and purchased by consumers in the United States or Canada, which are accompanied by this written

Who is Covered?

This warranty extends only to the first consumer purchaser, and is not transferable

What will MOTOROLA SOLUTIONS INC. do?

Motorola Solutions, Inc., at its option, will at no charge repair, replace or refund the purchase price of any Products or Accessories that do not conform to this warranty. We may use functionally equivalent reconditioned/ refurbished/ pre-owned or new Products or Accessories.

What Other Limitations Are There?

Any Implied Warranties, Including Without Limitation The implied warranties of merchantability and fitness for a particular purpose, shall be limited to the duration of this limited warranty, otherwise the repair, replacement, or refund as provided under this express limited warranty is the exclusive remedy of the consumers, and is provided in lieu of all other warranties express or implied. In no event shall Motorola Solutions be liable, whether in contract or tort (including negligence) for damages in excess of the purchase price of the product or accessory, or for any indirect, incidental, special or consequential damages of any kind, or loss of revenue or profits, loss of business, loss of information or other financial loss arising out of or in connection with the ability or inability to use the products or accessories to the full extent these damages may be disclaimed by law

Some states and jurisdictions do not allow the limitation or exclusion of incidental or consequential damages, or limitation on the length of an implied warranty, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state or from one jurisdiction to anothe
