Printed in

- Increase the volume only if you are in noisy surroundings.
- Reduce the volume before connecting headset or earpiece.
- Limit the amount of time you use headsets or earpieces at high volume.
- When using the radio without a headset or earpiece, do not place the radio's speaker directly against your ear.
- If you experience hearing discomfort, ringing in your ears, or speech that is muffled, you should stop listening to your radio through your headset or earpiece, and have your hearing checked by your doctor.

Refer to the Approval manual that ships with the radio for information on intrinsic and/or non-incendive safety certification.

ATTENTION

Before using this product, read the RF Energy Exposure and Product Safety Guide that ships with the radio which contains instructions for safe usage and RF energy awareness and control for compliance with applicable standards and regulation.

ACOUSTIC SAFETY

Exposure to loud noises from any source for extended periods of time may temporarily or permanently affect your hearing. The louder the radio's volume, the less time is required before your hearing can be affected. Hearing damage from loud noises is sometimes undetectable at first and can have a cumulative effect.

To protect your hearing:

- Use the lowest volume necessary to do your job.

HEADSET OPERATION

1. Turn off the radio. Connect headset to the radio, making sure not to over tighten mounting screw (where applicable).
2. Turn on the radio, making sure not to set volume level of the radio too loud.
3. Adjust the head strap for best fit/comfort.
4. Position the boom mic 1/2 to 3/4 inch from the user's mouth.
5. Press PTT to transmit audio from headset microphone. Release PTT to receive audio into headset speakers.

NOTE: On some radio models, the Voice Over Activation (VOX) functionality is activated by radio settings. Refer to the radio Customer Programming Software (CPS) for configuration.
